

HotelKey Central Reservation System

Streamline multi-channel bookings through one unified, all-in-one platform. Prevent over bookings with real-time inventory sync and distribution management.

Features

Rate & Room Type Administration

Manage complex room setups and rate plans with automated hierarchies, configurable source assignments, and scalable multi-property support.

Distribution

Maintain real-time rate and inventory distribution with direct OTA connections and channel performance tracking.

Find & Reserve

Simplify multi-property reservations with real-time availability, itinerary bookings, and detailed property and city-based search experiences.

Advantages

Real-Time Inventory Sync

Prevent overbooking with live inventory updates across all booking channels.

Centralized Distribution

Manage multi-channel distribution from one unified platform.

Revenue Optimization

Maximize revenue with accurate availability and faster rate updates.

One Platform, Endless Solutions.

Unlock efficiency with HotelKey CRS

HotelKey GDS Chain Code

To maximize distribution, HotelKey offers accessible GDS connectivity through our HotelKey Chain Code, fully certified for Amadeus, Sabre, and TravelPort (Galileo and Worldspan).

Note: HotelKey GDS does not cover any separate charges that originate from third-party connection channels. Any third-party pass-through fees that relate to the client's use of the HotelKey GDS are the property's responsibility to pay directly.

True Single Image Inventory From a Unified PMS and CRS Platform.

OTA/GDS partners perform real-time shop and book for rates to ensure rate parity across all channels.

Need to reach OTAs beyond our direct connections? For a small fee, our partnership with RateGain connects you to hundreds of alternative channels.
